🏨 Hostel Management System

A full-stack Java-based web application to efficiently manage hostel operations like student records, room allocation, and attendance.

🚀 Features

- 👨‍🎓 Student Registration & Login
- 🛏️ Room Allocation & Management
- 📅 Attendance Tracking System
- 📝 Outpass Management
- 📊 Admin Dashboard

🛠️ Tech Stack

- Backend: Java, Spring Boot
- Frontend: HTML, CSS, JavaScript
- Database: MySQL

📂 Project Structure

- src/ → Source code
- resources/ → Configuration files & templates
- pom.xml → Project dependencies

▶️ How to Run

1. Clone the repository
2. Open in IntelliJ / Eclipse
3. Configure MySQL database
4. Run the main application
5. Open browser: http://localhost:8080

📌 Future Improvements

- Face Recognition Attendance
- Mobile App Integration
- Email Notifications
